TRAININGS / CERTIFICATIONS

Web Application Development
Jul 2024 - Aug 2024
NIIT, Kolkata

The Joy Of Computing Using Python
Aug 2023 - Nov 2023
NPTEL, Virtual

PROJECTS

[Blog site ↗](#)
Jul 2024 - Aug 2024

The project is a comprehensive blog management system that allows users to perform various operations on blog posts, such as creating, updating, viewing, and deleting them. The system is built with a strong focus on security, incorporating robust authentication mechanisms to ensure that only authorized users can access sensitive functionalities like post creation and updates. The front end is developed using React.js, leveraging components for a modular and dynamic user interface. The backend is powered by Express.js, a flexible web server framework for Node.js, which handles server-side logic, API routing, and interactions with the MongoDB database to manage data storage and retrieval.

[Weather application ↗](#)
Jan 2023 - Dec 2023

A user-friendly weather app providing real-time, location-specific updates. With an intuitive interface, users easily access accurate forecasts, wind speeds, etc.

SKILLS

- HTML
 - Bootstrap
 - Express.js
- CSS
 - ReactJS
 - MongoDB
- JavaScript
 - Node.js
